***Dogodek poteka pod častnim
pokroviteljstvom predsednika Republike
Slovenije Boruta Pahorja.***

Povabilo na 13. kongres zdravstvene in babiške nege slovenije

Že 13. po vrsti kongres zdravstvene in babiške nege Slovenije bo poseben, drugačen. Tako drugačen in poseben kot je posebno vse leto. Pandemija koronavirusne bolezni je nehote v središče dogajanja postavila prav zdravstvo, katerega večinski del predstavljamo medicinske sestre in babice. Zato je izbrani naziv kongresa »**Medicinske sestre in babice v središču globalnih izzivov za razvoj in prihodnost zdravstva**« sam po sebi še kako zgovoren.

Vse bolj se srečujemo z globalnimi zdravstvenimi izzivi in spletni kongres bo ob teh izzivih omogočil tudi globalno povezovanje izjemnih predavateljev z vseh koncev in krajev. To bo zagotovo pritegnilo k udeležbi še večje število udeležencev, ki boste kongres lahko spremljali tako z delovnega mesta kot iz domačega naslanjača.

Mednarodno priznani strokovnjakinji iz tujine bosta osvetlili pomen zdravstvene nege in babištva v teh posebnih časih v evropskem in svetovnem merilu. Kako solidarni smo kot družba, na planetu, ki ne raste, koliko trnja in zvezd je tudi v našem poklicu ter kako se ob vsem tem počutijo pacienti, bodo teme kongresa, ki vas ne bodo pustile ravnodušne. Kaj nam bo prinesla prihodnost in kako bomo sobivali z umetno inteligenco tudi v zdravstvu, so prav posebna vprašanja. Tudi na takšna vprašanja bodo poskušali najti odgovore nekateri vabljeni predavatelji.

Mednarodni dan babic, ki ga bomo obeležili 5. maja, bo z motom »**Upoštevajte podatke – vlagajte v babice**« po vsem svetu opozarjal na to, kako pomembne so babice v sleherni družbi. Sporočilo ob mednarodnem dnevu medicinskih sester, 12. maj, ki ga je izbral Mednarodni svet medicinskih sester (ICN), je »**Glas medicinskih sester: vizija za prihodnost zdravstva**« in prav tega se še kako zavedamo tudi doma. Zato verjamemo, da je izbrani program kongresa zares najboljša priložnost, da se povežemo, pa čeprav le spletno, v kar največjem številu, najrazličnejši strokovnjaki v zdravstvenem timu. Še prav posebej bomo veseli druženja s stanovskimi kolegicami in kolegi, ki jim kongres poklanjamo ob mednarodnem letu medicinskih sester in babic.

Vljudno vabljeni na prvi spletni kongresni dogodek.

Monika Ažman
predsednica Zbornice - Zveze

12/05/2021

13. kongres zdravstvene in babiške nege Slovenije

P R O G R A M

8.00 - 9.00	REGISTRACIJA
9.00 – 9.10	POZDRAVNI NAGOVORI, <i>Monika Ažman, predsednica Zbornice - Zveze, Janez Poklukar, minister za zdravje</i>
9.10 – 9.30	EFN - VOICE OF NURSES IN EUROPE, <i>Elizabeth Adams, predsednica EFN</i>
9.30 – 9.50	THE POTENTIAL IMPACT OF MIDWIVES ON LIVES SAVED, AND WHAT THIS MEANS FOR THE FUTURE OF MIDWIFERY, <i>Frances McConville, WHO</i>
9.50 – 10.10	DRŽAVLJANI ZAUPAJO MEDICINSKIM SESTRAM, KAJ PA ZDRAVSTVENA POLITIKA?, <i>prof. dr. Brigita Skela Savič</i>
10.10 – 10.20	<i>Aktivni odmor z Darijo</i>
10.20 – 10.40	PANDEMIJA IN SOLIDARNOST, <i>prof. dr. Mladen Dolar</i>
10.40 – 11.00	ŽIVIMO NA PLANETU, KI NE RASTE, <i>prof. dr. Lučka Kajfež Bogataj</i>
11.00 – 11.20	OPRAVLJATI POKLIC ALI BITI POKLICAN, <i>Zenel Batagelj</i>
11.20 – 11.40	SKOZI TRNJE DO CVETLICE, <i>Polona Šafarič Tepeš</i>
11.40 – 12.00	<i>Predstavitev podpornikov kongresa, aktivni odmor z Darijo</i>
12.00 – 12.20	DINAMIČNO ZDRAVSTVO V RIGIDNIH ZDRAVSTVENIH SISTEMIH, <i>prof. dr. Petra Došenović Bonča</i>
12.20 – 12.40	PRIHODNOST ZDRAVSTENIH POKLICEV V DRUŽBI 5.0: SOBIVANJE ČLOVEŠKE IN UMETNE INTELIGENCE?, <i>Dr Jana Javornik</i>
12.40 – 13.00	ZDRAVSTVENA NEGA V LUČI UPORABE NAPREDNIH TEHNOLOGIJ, <i>asist. Andrej Fink</i>
13.00 – 13.40	OKROGLA MIZA Z GOSTI: <i>asist. Andrej Fink, dr. Nana Fartek, Simona Jamnik Čok, TELEZDRAVSTVO – PRIHODNOST ZDRAVSTVENIH SISTEMOV ZA UPORABNIKE ZDRAVSTVENIH STORITEV</i>

Kongres bo povezovala Maja Sodja.

ELIZABETH ADAMS

EFN - Voice of nurses in Europe

P R E D A V A T E L J I

Elizabeth Adams je predsednica Evropske federacije združenj medicinskih sester in zastopa tri milijone medicinskih sester po Evropi. Trenutno je vodja službe za politiko varnosti in zagovorništva pacientov pri Nacionalnem uradu za varnost pacientov na Ministrstvu za zdravje Severne Irske. Je članica upravnega odbora globalne kampanje Nursing Now, ustanovljene na podlagi poročila The Triple Impact of Nursing. Njeno mednarodno delovanje vključuje tudi članstvo v številnih mednarodnih skupinah, kot sta Koalicija za varovanje zdravja na vojnih območjih in Mednarodni center za migracije medicinskih sester. Poleg tega je izredna profesorica na Univerzi za tehnologijo Curtin, Zahodna Avstralija in University College Dublin, častna članica Fakultete za zdravstveno nego in babištvo Royal College of Surgeons Ireland.

Elizabeth Adams is currently the Patient Safety and Advocacy Policy Officer, National Patient Safety Office in the Department of Health. She has been recently appointed Adjunct Faculty, Dublin City University. She is President of the European Federation of Nurse Associations and represents 3 million nurses across Europe. She is a Board member of the global Campaign Nursing Now, based on the report The Triple Impact of Nursing (UK All-Party Parliamentary Group on Global Health). Her international representation includes membership of numerous global groups, including, for example, Safeguarding Health in Conflict Coalition and International Centre of Nurse Migration. In addition, she is Adjunct Associate Professor with Curtin University of Technology, Western Australia and University College Dublin, Honorary Fellow Faculty of Nursing and Midwifery Royal College of Surgeons Ireland.

FRAN MCCONVILLE

The potential impact of midwives on lives saved, and what this means for the future of midwifery

Fran McConville je babica in medicinska sestra z magisterijem iz zoologije in doktoratom iz ekonomije v zdravstvu. Potem ko je bila sredi 80. let prejšnjega stoletja v Bangladešu kot volonterska babica, se je večino kariere ukvarjala s področjem spolnega, reproduktivnega zdravja in zdravja žensk in otrok v Jugovzhodni Aziji, Afriki in na Bližnjem vzhodu. Kot svetovalka je sodelovala z vrsto agencij, nevladnimi organizacijami in Združenimi narodi.

Fran je trenutno svetovalka za babištvo pri Svetovni zdravstveni organizaciji s sedežem v Ženevi in zagotavlja tehnično in organizacijsko podporo 194 državam članicam. Je vneta zagovornica pravic žensk, novorojenčkov in njihovih družin ter dostopa do kakovostne babiške obravnave za vse. Skrbi za to, da zagotovljena babiška obravnava ne temelji le na obstoječih dokazih, temveč tudi na znanju.

Fran McConville qualified as a midwife and a nurse, has a BSc in Zoology and an MSc in Health Economics. After being a VSO midwife in Bangladesh in the mid-1980's, Fran spent much of her career in sexual, reproductive, maternal and newborn health and gender in South East Asia, Africa and the Middle East, working with a range of NGO's and UN agencies and as a Health Adviser to the UK department of international development (DFID).

Fran is currently the Midwifery Adviser to the World Health Organization, based in Geneva, providing technical and policy support to the 194 Member States. She is passionate about the rights of women, newborns and their families to have access to quality midwifery care everywhere, and ensuring that the care provided is based not only on existing evidence but on knowledge that challenges assumptions and arises from asking different questions.

Državljeni zaupajo medicinskim sestram, kaj pa zdravstvena politika?

Prof. dr. Brigita Skela Savič, znanstvena svetnica, je visokošolska učiteljica in raziskovalka na FZAB od njene ustanovitve, od 2006 do 2017 tudi dekanja fakultete. Na FZAB je nosilka predmetov na področju raziskovalnih metod, na dokazih podprtega dela in menedžmenta v zdravstvu na vseh treh bolonjskih stopnjah. Habilitirana je na FZAB in Univerzi na Primorskem. Je raziskovalka zdravstvenega menedžmenta, dolgožive družbe, promocije zdravja, elementov profesionalizacije zdravstvene nege in drugih zdravstvenih strok. Ima bogat opus znanstvenih objav v mednarodnih in domačih revijah in bogate izkušnje z vodenjem in sodelovanjem v mednarodnih in nacionalnih raziskovalnih projektih. Na FZAB vodi Katedro za zdravstvene vede. Na Medicinski fakulteti Univerze v Ljubljani je nosilka izbirnega predmeta na doktorskem študiju. Mednarodno deluje kot raziskovalka in vabljen strokovnjakinja v razvojne in raziskovalne projekte na področju izobraževanja in razvoja zdravstvene nege. Od 2013 do 2018 je bila glavna in odgovorna urednica Obzornika zdravstvene nege, je članica uredniškega odbora revij Zdravstveno varstvo, Obzornika zdravstvene nege in Nurse Education Today. Za obdobje 2017 do 2021 je izvoljena v svet direktorjev Mednarodnega sveta medicinskih sester, ICN zastopa v organizaciji Global Coalition on Aging. Je družbeno aktivna državljanka, zagovornica dostopne in kakovostne zdravstvene obravnave za vse državljane.

Brigita Skela-Savič is a full professor in research and evidence-based practice in health care at Angela Boškin Faculty of Health Care (ABFHC) in Slovenia. She is Head of Chair for Health Care Sciences and Head of Institute Angele Boškin for research's in Health Care Sciences. She served as the Faculty Dean from 2006 to 2017 and she was the first dean of nursing faculty with background in nursing in Slovenia.

At the ABFHC, she teaches research methodology, evidence-based practice in healthcare, and healthcare management, mostly on master and PhD level. At the Faculty of Medicine, University of Ljubljana, she teaches an elective course evidence-based practice in nursing as a part of the doctoral study program Public health.

In the international arena, she participates in development and research projects in the areas of education and nursing development as a researcher and an invited expert in nursing education Bosnia and Herzegovina and in Kyrgyzstan. In 2020, she started serving as an alternate member of the Medical Ethics Committee of the Republic of Slovenia. She was elected to serve on the ICN (International Council of Nurses) Board of Directors for the term 2017-2021, representing the ICN in the Global Coalition on Aging. From 2013 to 2018, she was the Editor-in-Chief and Managing Editor of the Slovenian Nursing Review. She is a member of the editorial board for the Slovenian Journal of Public Health, the Slovenian Nursing Review, and Nurse Education Today.

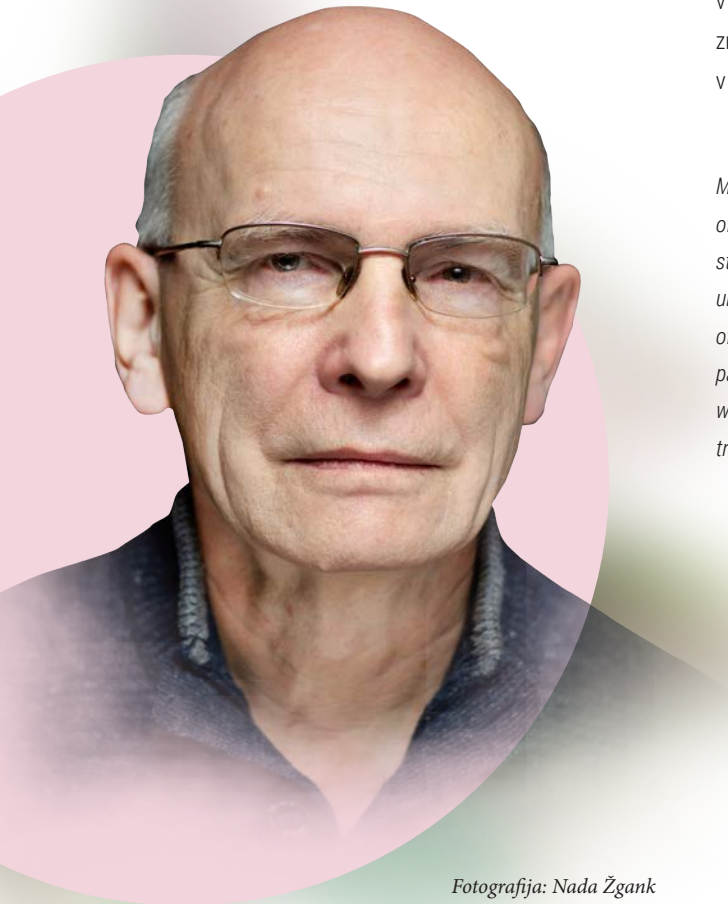

M L A D E N D O L A R

Pandemija in solidarnost

Mladen Dolar je profesor in znanstveni svetnik na Oddelku za filozofijo Filozofske fakultete Univerze v Ljubljani. Njegova glavna raziskovalna področja so nemški idealizem, strukturalizem in psihoanaliza ter filozofija umetnosti. Predaval je na številnih univerzah v Evropi in Ameriki (redno je gostujoči profesor na univerzi v Čikagu in na European Graduate School v Švici). Poleg skoraj 200 razprav in člankov v znanstvenih revijah in zbornikih je avtor 14 knjig v slovenščini, v tujini pa je najbolj znana njegova knjiga o glasu *A Voice and Nothing More* (MIT 2006), ki je bila prevedena v deset jezikov.

*Mladen Dolar is Professor and Senior Researcher at the Department of Philosophy, Faculty of Arts, University of Ljubljana. His principal areas of research are German idealism, structuralism and psychoanalysis, and philosophy of art. He has lectured extensively at universities across Europe and in the USA (he is a regular Visiting Professor at the University of Chicago and at the European Graduate School in Switzerland). Apart from nearly 200 papers in scholarly journals and collective volumes he published fourteen books in Slovene, while his most notable book publication abroad is *A Voice and Nothing More* (MIT 2006), translated into ten languages.*

Fotografija: Nada Žgank

Živimo na planetu, ki ne raste

Diplomirala je leta 1980 na Fakulteti za naravoslovje in tehnologijo v Ljubljani in doktorirala na Biotehniški fakulteti. Je redna profesorica na Biotehniški fakulteti, predstojnica Katedre za agrometeorologijo in članica Medvladnega foruma za podnebne spremembe (IPCC) v Ženevi. V Sloveniji velja za eno izmed pionirk pri raziskovanju vpliva podnebnih sprememb, predvsem njihovega vpliva na rast in kmetijsko pridelavo. Problematiko aktivno predstavlja tudi s poljudnimi objavami. Leta 1988 je s soavtorjem prejela nagrado Sklada Borisa Kidriča za originalne prispevke k dinamičnemu modeliranju produkcijske organske mase v odvisnosti od okolja v lokaciji in širšem prostoru. Znotraj Medvladnega odbora za podnebne spremembe Združenih narodov (IPCC) je kot članica opravljala veliko različnih funkcij. Leta 2007 je IPCC za prizadevanje pri ozaveščanju javnosti o usodnih posledicah segrevanja ozračja prejel Nobelovo nagrado za mir in z njim je tudi Lučka Kajfež Bogataj postala soprejemnica te prestižne nagrade. Leta 2008 je prejela red za zasluge za odmevno znanstveno delo na področju proučevanja podnebnih sprememb ter njeno predanost varovanju okolja.

Lučka Kajfež Bogataj graduated in 1980 from the Faculty of Natural Sciences and Engineering in Ljubljana and obtained her PhD from the Biotechnical Faculty where she is today a Full Professor and Chair of Agrometeorology as well as a member of the Intragovernmental Panel on Climate Change (IPCC) in Genève. In Slovenia she is recognised as one of the pioneers of researching the impact of climate change, especially on growth and farming. She has been publicly drawing attention to the issue by publishing articles for the popular audience. In 1988 she and her co-author received the Boris Kidrič Fund Award for an original contribution to dynamic modelling of production organic mass in relation to the environment in the location and wider space. As a member of the Intragovernmental Panel on Climate Change (IPCC) she has served in various roles. In 2007 the IPCC received a Nobel Peace Prize for raising awareness of the public on the detrimental consequences of global warming, thus becoming a joint recipient of the Prize. In 2008 she received the Order of Merit for her far-reaching scientific work in climate change and her dedication to environmental protection.

Opravlјati poklic ali biti poklican

Zenel Batagelj je ustanovitelj in partner v družbi VALICON, kjer svetuje ključnim naročnikom na področju trženja, znamčenja in strategij rasti. Na tem področju je eden najbolj vidnih strokovnjakov v jugovzhodni Evropi. V zadnjem času se poglobljeno ukvarja z arhitekturo, identiteto in upravljanjem znamk ter integracijo znamčenja z upravljanjem potrošniške izkušnje v najširšem pomenu besede. Znamkam pomaga spet vdahni smisel, kar je v virusnih časih še kako aktualno. Posebej ga privlačijo start upi s poudarkom na distribuiranih sistemih. Z uporabo inovativnih metod, kot so LEGO® SERIOUS PLAY®, strategij v realnem času in aplikacijo arhetipov, je prišel do občutnih pohitritev strateških odločevalskih procesov.

Je dober poznavalec tako slovenskega kot regionalnega potrošnika pa tudi širše. Je aktiven član Društva za marketing Slovenije ter pogost predavatelj na večjih trženjskih dogodkih, tudi oglaševalska osebnost leta 2015. Na strokovnem področju ima tudi objave v številnih mednarodnih strokovnih revijah, med drugim je tudi soavtor poglavja dela, izdanega v prestižni založbi Wiley.

Zenel Batagelj is the founder and partner in the VALICON company where he advises key clients on marketing, branding and growth strategy and is one of the main experts in this field in South-Eastern Europe. Lately, he has been particularly involved in brand architecture, brand identity and brand management, as well as integration of branding and customer experience management in the broadest possible sense. He helps give brands back their a purpose, which is especially important at the time of a pandemic. He is drawn to start-ups that focus on distributed systems. By using innovative methods such as LEGO® SERIOUS PLAY®, strategies in real time and archetype application he has significantly optimised strategic decision-making processes.

He knows consumers in Slovenia, across the region and broadly very well. He is an active member of the Marketing Association of Slovenia and a frequent lecturer at larger marketing events. He was also the Advertising Person of the Year 2015. He has published several articles in international professional magazines and is a co-author of a chapter in a book published by the prestigious Wiley publishing house.

Skozi trnje do cvetlice

Slovenska znanstvenica Polona Šafarič Tepeš, ki raziskuje v New Yorku, se posveča razumevanju redkih rakov, vodenih preko fuzijskih onkoproteinov. Od nekdaj je sprejela sleherno priložnost za razumevanje znanosti: od biološko usmerjene gimnazije do doktorata na Fakulteti za farmacijo. 2015 je ustanovila sodelovanje med Cold Spring Harbor Laboratorijem (CSHL) v New Yorku, domu osmih Nobelovih nagradencev, in Fakulteto za farmacijo ter istega leta začela svojo doktorsko izmenjavo. Na CSHL je razvila in vitro model mezenhimskega hondrosarkoma, vodenega preko HEY1-NCOA2 fuzije in predklinični in vivo model, ter našla uspešno tarčno terapijo. Ti rezultati so jo pripeljali do sodelovanja s sarkomskim strokovnjakom prof. dr. med. Robertom Makijem, FACP, FASCO, ki vodi multicentrično klinično študijo z omenjeno tarčno terapijo. Na podlagi njenih rezultatov so začeli novačiti paciente z mezenhimskim hondrosarkomom po ZDA v 2020. Življenjska izkušnja v temperamentnem New Yorku ji je odprla oči o marsikaterih težavah, ki jim prej ni bila neposredno izpostavljena. Problematika žensk v znanosti in zdravstvu je postal njen »projekt v prostem času«. Vzpostavila je sodelovanje s slovensko veleposlanico Združenih narodov, zaveznico žensk v znanosti, s katero sta organizirali uraden obisk 12 veleposlanikov ZN v CSHL. 2020 in 2021 je bila povabljen panelistka na konferenci Združenih narodov, organizirane preko kraljevske akademije Royal Academy of Science International Trust (RASIT) na mednarodni dan žensk in deklic v znanosti. 2021 je postala znanstvena sodelavka kraljevske akademije RASIT, kjer pomaga pri ustvarjanju dogodkov ZN z namenom povezovanja strokovnjakov ter ambasadorjev na temo različnih znanstvenih problematik, vključno s spolno enakopravnostjo. Poleg tega je članica slovenskega društva VTIS, kjer je letos soustvarila klub Slovenk po svetu z namenom povezovanja in medsebojnega sodelovanja uspešnih Slovenk.

A Slovenian-born, New York-based scientist, Polona Safaric Tepes is investigating fusion-driven cancers to find an effective treatment for rare type pediatric cancers. She always enjoyed learning about science and biology didn't allow any science program or school to slip away from a science-oriented high school to a Ph.D. program. She established a collaboration between world-renown Cold Spring Harbor Laboratory (CSHL) NY, home to eight Nobel Prize laureates, and the Faculty of Pharmacy at the University of Ljubljana, Slovenia, where she is currently enrolled in Ph.D. She has been working at the CSHL, NY for over 5 years where she developed a new blueprint to study under-researched rare tumors, driven by fusion oncogenes, such as mesenchymal chondrosarcoma. She also developed a preclinical model of this disease and found an effective treatment which led her to collaborate with leading sarcoma expert, dr. Robert Maki, MD, Ph.D., to enroll the patients with mesenchymal chondrosarcoma in a USA-wide clinical trial with a new targeted therapy. In 2019 she became involved through the Slovenian mission to the United Nation (UN) in calls for action on gender equality, and she was an invited speaker at the conference on the International Day of Women and Girls in STEM at the UN in 2020 and 2021, to address the gender gap issues in science and healthcare. Since then she became an active member of the Royal Academy of Science International Trust, the organizer of gender equality events at the UN, where she moves forward to address the issues of women in STEM globally. However, she is eager to contribute the awareness for gender equality in her mother-country, Slovenia. Through the Association of Slovenes Educated Abroad (Društvo VTIS) she co-founded the Slovenian Women Abroad club, to help bridge the gender inequality gap also in Slovenian academy and healthcare, where she is currently involved in helping to write a White Paper for Slovenian Research and Innovation Strategy 2021-2030.

P E T R A D O Š E N O V I Č B O N Č A

Dinamično zdravstvo v rigidnih zdravstvenih sistemih

Petra Došenović Bonča je izredna profesorica na Ekonomski fakulteti Univerze v Ljubljani. Njeni raziskovalni področji sta ekonomika javnega sektorja in ekonomika zdravstva. Na slednje posega tudi njena doktorska disertacija iz leta 2011 z naslovom Inovacije kot dejavnik učinkovitosti in uspešnosti bolnišnic v Sloveniji. Petra Došenović Bonča je članica sosveta za zdravje Statističnega urada Republike Slovenije. Je članica znanstvene organizacije The Operational Research Society. V obdobju 2013–2017 je bila na Ekonomski fakulteti koordinator mednarodne akreditacije poslovnih šol EQUUS. Objavila je članke, v katerih analizira in proučuje različne vidike slovenskega zdravstvenega sistema in reforme ter politike v tem sektorju. Sodeluje v svetovalnih projektih na področju zdravstva v Sloveniji. Na Ekonomski fakulteti je aktivno sodelovala pri razvoju magistrskega študija Management in ekonomika v zdravstvenem varstvu. Od leta 2017 je tudi vodja tega programa, predava pa pri predmetih Osnove ekonomike zdravstvenega varstva, Ekonomske analize v zdravstvu, Zdravstveno zavarovanje ter Zdravstvo in zdravstveni sistemi.

Petra Došenović Bonča is an associate professor at the Faculty of Economics, University of Ljubljana. Her research areas are public economics and health economics. Her doctorate thesis from 2011 titled "Innovations as determinants of hospital efficiency and performance" also dealt with these areas of research. She is currently a member of the Statistical Advisory Committee for Health at the Statistical Office of the Republic of Slovenia. She is also a member of the Operational Research Society. In the 2013–2017 period, she was the coordinator of the international accreditation of business schools EQUUS at the Faculty of Economics. She has published several academic articles analysing and evaluating Slovenia's health care system as well as policy initiatives related to this sector. She has also participated in reform efforts and has been involved in consultancy projects for hospitals in Slovenia. She has participated in the development of the first postgraduate degree programme in Health Economics and Management offered in Slovenia. Since 2017, she is the head of this programme and a lecturer of the following subjects: Principles of Health Economics, Health Systems and Policies, Economic Evaluation in Health Care and Health Insurance.

JANA JAVORNIK

Prihodnost zdravstvenih poklicev v družbi 5.0: Sobivanje človeške in umetne inteligence?

P R E D A V A T E L J I

Dr Jana Javornik je doktorirala iz primerjalne socialne politike in politične ekonomije na univerzi v Southamptonu v Združenem kraljestvu. Je mednarodno aktivna raziskovalka na področju delovnih razmerij, družinske in socialne politike, ki sodeluje v številnih strokovnih in civilnodružbenih društvih. V preteklosti je vodila Poročila o človekovem razvoju Slovenije (z Razvojnim programom ZN); sodelovala pri pripravah in spremljanju izvajanja Razvojnih strategij Slovenije in pri konceptih, metodah in kazalnikih človekovega razvoja in blaginje. Bila je svetovalka škotski vladi pri reformi politike otroškega varstva, sodeluje z islandsko vlado pri reformi družinske politike, za arabske vlade pripravlja smernice družinskih politik, sodeluje pri urejanju strokovnih revij, predava in raziskuje. Živi in deluje v Združenem kraljestvu, je profesorica na University of Leeds in gostujoča raziskovalka Stockholm University na Švedskem in Utrecht University na Nizozemskem. Do februarja 2021 je bila direktorica direktorata za visoko šolstvo pri Ministrstvu za izobraževanje, znanost in šport.

Dr Jana Javornik obtained her PhD in social policy and political economy at the University of Southampton in the United Kingdom. She is an international researcher of employment relations, family and social policy. She is a member of various professional and civil society associations. In the past she coordinated the Human Development Report Slovenia (with the United Nations Development Programme); she participated in preparations and monitoring of the implementation of Development Strategies of Slovenia, and in designing concepts, methods and indicators of human development and well-being. She has also been advising the Scottish government on childcare policy reform, has cooperated with the Icelandic government in reforming family policy, has been designing family policy guidelines for Arab governments and has been editing journals. She also lectures and researches. She lives in the UK where she is a professor at the University of Leeds and a guest researcher at the Stockholm University in Sweden and Utrecht University in the Netherlands. Until February 2021 she had been Director-General of Higher Education at the Ministry of Science, Education and Sport.

Zdravstvena nega v luči uporabe naprednih tehnologij

Asist. Andrej Fink je leta 2000 diplomiral na Visoki šoli za zdravstvo v Ljubljani na smeri zdravstvena nega in si pridobil naziv diplomirani zdravstvenik. Leta 2005 je zaključil univerzitetni študij na Fakulteti za organizacijske vede Univerze v Mariboru in si pridobil naziv univerzitetni diplomirani organizator. Na podiplomskem študiju na George Washington University School of Medicine and Health Sciences, smer Emergency Services Management, si je leta 2010 pridobil naslov MSHS (Master of Science in Health Sciences). Od leta 1994 je bil vodja Reševalne postaje Univerzitetnega kliničnega centra v Ljubljani, kjer je leta 2018 prevzel vodenje Dispečerske službe zdravstva. Na Fakulteti za zdravstvo Angele Boškin sodeluje kot visokošolski učitelj pri predmetih Nujna medicinska pomoč in zdravstveno varstvo v posebnih razmerah in Anestezilogija in oživiljanje. Na nacionalni ravni se intenzivno ukvarja z razvojem zdravstvene dispečerske službe ter pripravami zdravstva na delovanje v izrednih razmerah. Za svoje dolgoletno delo na tem področju je prejel bronasti in srebrni znak civilne zaščite kot priznanje za posebne zasluge in izjemne prispevke pri razvijanju in krepitevi varstva pred naravnimi in drugimi nesrečami ter za izume in inovacije na tem področju. Za svoje delo na strokovnem področju je prejel najvišje priznanje Zbornice zdravstvene in babiške nege Slovenije – Zveze društev medicinskih sester, babic in zdravstvenih tehnikov Slovenije zlati znak.

Assistant Andrej Fink graduated in Nursing from the University College of Health Studies in Ljubljana, and was awarded the title of Registered Nurse. In 2005 he completed university studies at the Faculty of Organisational Sciences, University of Maribor and was awarded the title of a university graduate in Organisational Sciences. He continued his postgraduate studies at the George Washington University School of Medicine and Health Sciences in Emergency Services Management where in 2010 he was awarded the title Master of Science in Health Sciences. Since 1994 he has been the head of the Rescue Station of the University Medical Centre Ljubljana, where he became Ambulance Manager. He has been a lecturer in Urgent Medical Help and Health Care in Special Circumstances, and Anesthesiology and Resuscitation at the Angela Boškin Faculty of Health Care. At the national level, he has been working on development of ambulance health services and emergency health care. For his extensive work in this area, he has received the Bronze and Silver Medal of civil protection as a recognition for his special and extraordinary contribution in developing and strengthening protection from natural and other disasters, and for inventive and innovative work in this area. For his professional work he has been awarded the highest award conferred by the Nurses and Midwives Association of Slovenia, the Golden Medal.

NANA FARTEK

TELEZDRAVSTVO – prihodnost zdravstvenih sistemov za uporabnike zdravstvenih storitev

OKROGLA MIZA

Nana Fartek je diplomirala leta 2007 na Medicinski fakulteti v Ljubljani in leta 2014 končala specializacijo iz družinske medicine. Dobrih deset let je delala v zdravstvenem domu, od leta 2013 pa v svoji ambulanti. V svoji karieri se je predano vključevala tudi v delo ambulante nujne medicinske pomoči, tako pri pregledih odraslih in otrok ter urgentnih intervencijah. V svoji praksi in v okviru Zdravstvenega nasveta uvaja sodobne pristope, tudi telemedicino, ki je zlasti v času Covid -19 omogočila mnogim dostopnost do kakovostne zdravstvene obravnave. Na okrogli mizi bo podelila svoje izkušnje iz prakse telemedicinske.

Nana Fartek graduated from the Faculty of Medicine in Ljubljana in 2007 and completed her specialization in family medicine in 2014. She worked in a health care centre for more than 10 years and started her practice in 2013. During her professional career, she also dedicated herself to work an emergency, in the field of screening for adults and children and in emergency interventions. In her practice and at the health advice service, she is introducing modern approaches, including telemedicine, which made it available to many people, particularly in the Covid -19 period. She will share her experiences of telemedicine practice at the roundtable.

SIMONA JAMNIK ČOK

TELEZDRAVSTVO – prihodnost zdravstvenih sistemov za uporabnike zdravstvenih storitev

Simona Jamnik Čok je univerzitetna diplomirana pravnica, ki zadnjih 5 let sodeluje pri razvoju programa interdisciplinarne Zdravstvene točke, ki omogoča, pacientom zdravstvene storitve na daljavo v obliki asistenčnega centra, skozi svetovanje, preventivo, triažiranje in učinkovito usmerjanje pacientov na zdravstvene storitve v okviru slovenskega zdravstvenega sistema. Povezovanje, sodelovanje in soustvarjanje med zdravstveno stroko, medicino, tehnologijo in družbenimi spremembami so njeno delo, ki je zanjo osmišljeno le, če je pripomogla k povečani dostopnosti zdravstvenih storitev in izboljšani oskrbi ljudi ob njihovem prizadevanju za ohranjanje in preventivo zdravja.

Simona Jamnik Čok is a university graduate of law who has been involved in the development of the interdisciplinary health points program for the last 5 years, which enables to provide patients with remotely managed health services in the form of a supervised center through counseling, prevention, triage and effective guidance of patients to health services within the Slovenian health system. Integration, cooperation and co-creation between the health profession, medicine, technology and social change are her work, which is meant for her only if it has contributed to increased accessibility of health services and improved care for people in their efforts to maintain and prevent health.

Medicino usmerjamo na nove poti

V Novartisu uporabljamo moč inovacij v znanosti za iskanje rešitev nekaterih najzahtevnejših zdravstvenih izzivov sodobne družbe. Naši raziskovalci premikajo meje znanosti, da bi izboljšali razumevanje bolezni in razvili nova zdravila na področjih z velikimi neizpolnjenimi zdravstvenimi potrebami. Stremimo k odkrivanju novih poti do boljšega in daljšega življenja.
